

GLENEALY PLANTATIONS SDN BHD

Pesticides Use Policy

Glenealy Plantations Sdn. Bhd. (GPSB) is committed to practising integrated pest management to minimize the usage of chemical pesticides and its associate environmental and food chain impacts.

GPSB is committed to:

- Adopt, where possible, environmentally friendly non-chemical methods of pest management and strives to avoid the use of chemical pesticides.
- Prohibit the use of:
 - Paraquat; and
 - Pesticides banned by Department of Agriculture.

Should the use of pesticides within the oil palm plantation become necessary, appropriate training and equipment shall be provided by plantation management to minimize health and environmental risks.

Storage of such pesticides and disposal of empty containers shall follow the approved procedures.
