

# **GLENEALY PLANTATIONS SDN BHD**

## **Waste Management Policy**

Glenealy Plantations Sdn. Bhd. (GPSB) adopts best practices in the removal, transport and disposal of all types of waste generated by its operation activities in its oil palm plantation area.

The management of waste, other than that classified and listed as scheduled waste under Environmental Quality (Scheduled Wastes) regulations 2005, First Schedule, shall follow a waste hierarchical approach that:

- Reduces;
- Reuses; and
- Recycles.

All these alternatives are in preference to disposal by burying.

Scheduled waste shall be stored, labelled, transported and the disposed of in compliance with the provisions of Scheduled Waste Regulation 2005 of Environmental Quality Act 1974.

Palm Oil Mill Effluent (POME) is treated to ensure that its Biochemical Oxygen Demand (BOD) level of final discharge is in compliance with the countries' regulation.

GPSB requires all employees and contractor working in GPSB oil palm plantation area to comply with this policy through the establishment of an appropriate waste management plan, which identify, manage and dispose the generated waste accordingly.
